## Trax Rate Manager

### A Single System of Record for All Rates

Our platform enables global real-time visibility into all contracted rates by market, mode, region, carrier, logistics service provider, and business unit, while creating a collaborative environment to centrally manage rate requests and de-risk the rate management process.

#### The Problem

- Lack of complete organizational visibility into all rates across modes, carriers, and regions
- Lack of assurance that rates are up to date, accurate, and approved by all stakeholders
- Lack of technology to gather data and perform modeling to support bids

#### The Solution

**Trax's Rate Manager allows for communication between you and your carriers in a single online system that ensures all rates are updated and conform to your data requirements for audit, procurement, and operations. Rate Manager provides:**

- Shared visibility to all rates for all involved parties
- Advanced notification of expired rates
- Submission approval workflow and rate validation for multiple approvers
- Linking of rates and invoice data, cost modeling, and simulation
- Library of over 50 prebuilt templates for all modes and regions
- Authorized carrier submitters with automatic rate data validation
- Service for all modes, lane types, services, and rate basis
- APIs for integrating rates with in-house systems
- Configurable data fields
