**trax**

TAKE CONTROL OF GLOBAL FREIGHT DATA ACROSS EVERY SOURCE AND SYSTEM

Trax's AI-powered platform turns fragmented global logistics data into a single source of truth. Our Data Integration Layer consolidates thousands of carrier and system formats into one centralized, audit-ready repository. The result: unmatched visibility, higher financial accuracy, and greater operational efficiency.

Control Your Data. Drive Better Decisions.

Unify every contract, rate, and charge in one intelligent system—standardized, searchable, and built for actionable insights at scale.

✓ **Enterprise Data Normalization Engine**
Harmonizes thousands of carrier, regional, and system data formats.

✓ **Centralized Global Data Repository**
Creates a single, audit-ready source of truth for all logistics data.

✓ **Advanced Data Search & Export Tools**
Quickly access, export, and integrate data into BI or TMS platforms.

✓ **Regional Analytics & Data Enrichment**
Unlock localized insights for better planning and decision-making.

✓ **Intelligent Alerts & Notifications**
Stay ahead of anomalies and data issues in real time.

UP TO 12% TRANSPORTATION SPEND REDUCTION
Identify hidden cost-saving opportunities across carriers, modes, and routes.

35% COST ALLOCATION ACCURACY BOOST
Make faster, data-driven financial decisions with enriched, normalized data.

65+ HOURS SAVED MONTHLY
Eliminate manual data reconciliation and accelerate reporting cycles.

TAKE CONTROL OF YOUR FREIGHT COSTS.

Trax brings intelligence, automation, and precision to every step of your logistics spend—so you can do more with less.
