

Predictable, Automated Payment Operations- Built for Global Logistics

Trax Payment Control automates complex payment processes across global transportation networks—whether Trax pays carriers directly or you do. From configurable close schedules to ERP-integrated delivery, our platform drives accuracy, reduces manual work, and ensures secure, compliant payments every time.

The Capabilities

WORKS THE WAY YOU DO

Whether you pay carriers directly or Trax pays on your behalf, our system supports full automation through ERP or direct integration.

FULL VISIBILITY INTO EVERY INVOICE

View invoices by close date and manage exceptions proactively—no more working off received dates.

AUTOMATED CLOSE DATE SCHEDULING

Automatically sets optimal close dates upon invoice receipt using payment terms and processing rules—ML-powered for continuous improvement.

DYNAMIC PAYTERMS INTEGRATION

Applies and updates payment terms automatically based on contract rules and payment history.

AUTOMATED FILE DELIVERY

Delivers close files securely and on time—no manual steps. Supports standard, custom, and ERP-ready formats.

OPERATIONAL WORKBENCH INTEGRATION

Connects with Trax's payment workflow engine to detect and resolve bottlenecks with AI-driven optimization.
